ISO 27001:2005 Managing PCI-DSS

Payment Card Industry-Data Security Standards (PCI-DSS) is the standard specifically tailor made for Payment Card Industry, whereas, ISO 27001:2005 is a general standard that can be generally applied to any industry.

Granularity levels of controls are an obvious differentiator, reason being the applicable industry.

PCI-DSS is a technical standard and hence needs a framework like ISO 27001:2005 for effective and efficient management.

Our program walks through both the standards grasping the spirits establishing the relationship between the two.

Delivery of the course will be interactive discussion with the participants' active participation.

To arrange an in-house program please contact us on : +91-20-65007644 / 45
